REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the invention as set forth in the claims. Specifically, the first set of regions having minimum distance D as recited (considerably greater than the corresponding distance d), in order to initiate the injection of a starting current, is not taught. The prior art shows, for example, guard rings, which have minimum distance D greater than the corresponding distance d for regions in the interior of the Schottky diode, but there is no evidence that such regions are associated with, or optimized for, initiation of starting current. The purpose of a guard ring, for example, is to prevent current flow at the edge of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist, whose telephone number is, (571) 272-1562.
